WORK EXPERIENCE

Developer Front-End

<https://www.elfcosmetics.com/>

Position: Developer Front-End

Dates: February 2018 to December 2019

Company: elf cosmetics

I worked developing and optimizing code for elf cosmetics, an ecommerce page, both on the frontend side with Javascript and Bootstrap 5, and on the backend side with node.js

Developer Full Stack

<https://taggiecards.com/>

Position: Developer FullStack

Dates: March 2020 to September 2021

Company: Taggiecards

I worked as a full stack developer, the site was based on wordpress, so I developed custom themes and plugins, everything was worked with gutenber blocks, I made static and dynamic blocks. I was working with react.js, php, mysql and nginx for the containers with docker. The company also made mobile apps with react native using expo cli.

Developer Back-End

Linkreart

Position: Developer Back-End

Dates: November 2021 to March 2023

Company: LinkreartR

My job at this company was to build the entire backend, through node.js using the express.js and nest.js frameworks with typescript. Developed API'S and REST API for communication with the front-end and the back-end.
